RE: Software Developer

Dear Hiring Manager,

Throughout my career, I have contributed to positive business results through effective organization, prioritization and follow-through of key organizational projects. My strengths and qualifications are an ideal match for the Software Developer requirements and will bring immediate value to your Company.

I am currently working on the TCS Financial Services Domain Product Team. My responsibility is to develop new features in BANCS(TCS Product for Financial Institutions) based on client requirements and also solve if any problem comes in the existing version on the client site. The project is based on JAVA technology and uses Oracle database.

TCS BaNCS is a Digital solution, providing financial institutions with the capability to design, configure, brand, and deploy apps on-demand based on their unique needs, while our analytics offering enables financial institutions with enhanced customer-centricity and operational performance. BaNCS is designed to work on Corporate Action Events.

To illustrate the scope of my career history and professional competencies, please take a moment to review my enclosed resume. I am grateful for your evaluation of my credentials and subsequent response.

Sincerely,
Sagor Chakraborty
