Subject: Application for Sr. Software Developer Position

Dear Hiring Manager,

I am writing to express my interest in the Sr. Software Developer position at your esteemed organization. With a proven track record of contributing to successful projects and leveraging my technical expertise, I am confident in my ability to bring immediate value to your team.

Currently, I am an integral part of the GL Telecommunication Domain Product Team, where I have accumulated 5 years of robust industrial experience in Advanced Java and related technologies. My skill set includes proficiency in Core & Advanced Java, Spring Boot, Spring MVC, and Hibernate.

In my role on the T-Mobile-IOT project within offshore teams, I actively engage in new enhancements and issue resolution collaboratively with onshore teams. My responsibilities encompass troubleshooting and debugging software issues, ensuring code quality through thorough code reviews, and maintaining the scalability and maintainability of the codebase.

The backend of the Spring Boot project I work on is supported by SQL Server for the database component. I am committed to identifying root causes of issues and developing effective solutions. My focus on code quality, maintainability, and scalability aligns with the high standards required in a dynamic development environment.

I have enclosed my resume for your review, providing a comprehensive overview of my career history and professional competencies. I am eager for the opportunity to discuss how my skills and experience align with the goals of your organization.

Thank you for considering my application. I look forward to the possibility of contributing to and growing with your team.

Sincerely,
Sagor Chakraborty
